What is COOLSIS?

COOLSIS is a leading school information system (SIS) which is a product of COOLSIS Technologies and it is fully integrated with Learning Management System. Since 2002, our team has been constantly developing COOLSIS to meet the needs of schools and districts. Initially, COOLSIS began serving charter schools in California. Now, COOLSIS serves various private and charter schools across the United States and in many countries all around

Attendance

COOLSIS is also equipped with attendance notes for individual students. Teachers can click on a period and double click on a student to add a description about the attendance mark if necessary; descriptions will be seen by parents.

No Hassle

Attendance should not be a hassle, with COOLSIS attendance is a quick and simple step. COOLSIS helps teachers take attendance easily with a customizable seating chart or a list of students.

Gradebook

With the option of announcing assignments, teachers can choose how early they want to announce upcoming assignments and schedule future pop quizzes that won't be announced to students. “My assignments to grade” gadget displays all assignments that are yet to be graded. Teachers can create the same assignment for multiple classes with one click.

Learning Management System

Learning Management System is the most effective way to engage student in learning process. To truly engage students and drive results for your lessons, you need modern solutions which provide the means to keep track of online assignments and quizzes all in one place.

Interactive Learning

Nothing is better than School Information System integrating LMS feature which is just one click away. Flexible testing and assessment options are all easily graded and reported. Students following their lessons online will not miss anything.

Discipline

Don't just penalize the bad behavior, reward the good behavior.

Behavior

COOLSIS Behavior module encourages positive student behavior and enhances the school climate. COOLSIS informs parents via e-mail when their child earns positive or negative points. With the Behavior module COOLSIS makes it easy to document incidents. Incident entries show the student, incident date, reported by, action, description, consequence/reward with points, and more.

Reports

In any school, reports should be concise and easy to generate to save time and supply valuable information. COOLSIS has been equipped with various reports for each user, which vary by user role. These reports are automatically generated for every user and are ready to view whenever needed. Every time new information is added or updated, COOLSIS updates the reports, behind the user interface.

Ease Workload

Teachers shouldn't have to worry about keeping track of assignments and their grades, that's why COOLSIS helps teachers locate and grade assignments easily.

Teaching

Teachers are the main working force of every school and they deserve a powerful, reliable, and easy-to-use system. With COOLSIS, teachers can easily navigate through all important aspects of their everyday tasks such as attendance, assignments, grading, communication log and behavior incidents through the teaching module.

Save Time

COOLSIS assists schools in various states in getting the state reports done quickly and correctly.

Assignment

COOLSIS provides various ways of accessing assignments as teachers can view and create assignments through individual course sections or through the assignments page. The assignments page shows all assignments of every course section the teacher teaches. Each assignment contains a sub-list of all students and their grades.

Student Information

With the COOLSIS Student Information module, student information is easy to access, manage, and update. COOLSIS stores information of current, pending, transferred, and no longer enrolled students. Student Information management has never been easier, as all information is accessible within seconds.

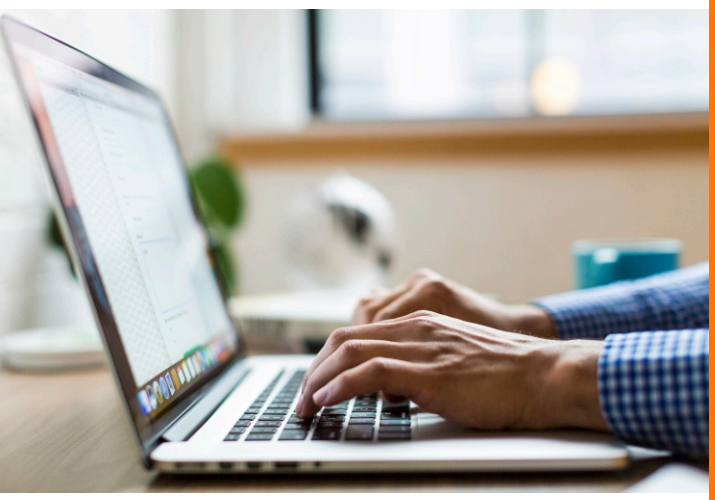

State Reporting

State reports shouldn't be a hassle to complete, so COOLSIS provides schools with automatically generated state and government reports to give schools more time to focus on education.

COOL SIS
SCHOOL INFORMATION SYSTEM

On-The-Go

Parents, Students and Staff can access COOLSIS anytime, anywhere via the COOLSIS Mobile Application.

Inform Parents

Parents receives Text Messages and Push Notifications instantly when teacher grades students, take attendance, and record behavior incidents.

Mass Emailing

Students can be categorized based on their grades groups and can receive emails about relevant topics with mass emailing feature. These categorized emails can also be sent to parents by ticking the check box.

Mobile Applications

Be up to date with the COOLSIS Mobile Application. Parents, students and staff can keep track of all academic information with this application as soon as any information is updated in COOLSIS. With the user-friendly interface, all information is easy to reach and is presented in a clear app-friendly way.

Mobile Messaging

Parents will be up to date with the COOLSIS Mobile Messaging. Parents receive Push Notifications if they have The COOLSIS Mobile Application. A parent who has a mobile phone can receive Text Messages.

COOLSIS HELPDESK

Support

The support every school should have. The COOLSIS Helpdesk is equipped with the tools to have users using COOLSIS at its full potential.

Stay Connected

We believe that parents and students should have a strong bond with schools, and now they can stay connected with your school through the COOLSIS Parent & Student Web Access.

Helpdesk

The Helpdesk features a ticket system where users can submit tickets any time of the day or night and rest assured knowing that each ticket will be answered in a timely basis. To make ticket responses more effective, users can attach screenshots to a ticket. Users that need to look for a past ticket can search through their history of tickets.

Parent & Student Web Access

Parents can always access their related student's current information anytime they want. Parents get access to all the academic records including assignments, grades, courses, club choices, schedule, attendance, behavior, transcript, and reports.

Online Enrollment

Parents can apply to your school online by using the COOLSIS Enrollment Inquiry

Online Inquiry

To facilitate the enrollment process COOLSIS has been equipped with the Online Inquiry modules. Administrators can set up a link to the application on their school website and rest assured knowing that all interested parents can apply to their school anytime.

Easy Management

As parents create applications online or submit paper applications, COOLSIS keeps track of various data to facilitate the enrollment process.

Data

With all the information COOLSIS stores, COOLSIS goes a step beyond by presenting organized and easy to read reports.

Store Everything

In COOLSIS, every student file is extensive, easy to access, and equipped with all the necessary fields.

Application Management

Application management in COOLSIS is designed to help schools choose their own enrollment criteria while being detailed enough to distinguish the current applicants, waitlisted, canceled, accepted, active, and transferred students. This diagram shows how a student goes from being an applicant to becoming an active student. There are various steps in the application process that COOLSIS helps to monitor.

COOLSIS
SCHOOL INFORMATION SYSTEM

Ready to Contact

As COOLSIS stores a lot of information regarding parents, COOLSIS also makes it very convenient to contact parents whenever needed.

Document Sharing

Being able to share school documents with parents and students is the key to improve communication and academic performance. Teachers can easily upload documents and attach them to course assignments.

Counseling

Ensure that all students receive the education needed to be on the path of success with COOLSIS.

Parent Information

COOLSIS provides schools with a module to store all parent information needed. COOLSIS makes parents unique for each district, meaning that for as many children the parent has in several schools of the district, there is only one parent file that corresponds to that parent.

College Counseling

The College Counseling features are detailed and provide all the information a counselor needs to assist students. The Graduation requirements include a customizable list of columns with the most important columns being: credits needed, credits required, exams required, status, and category type.

COOL SIS
SCHOOL INFORMATION SYSTEM

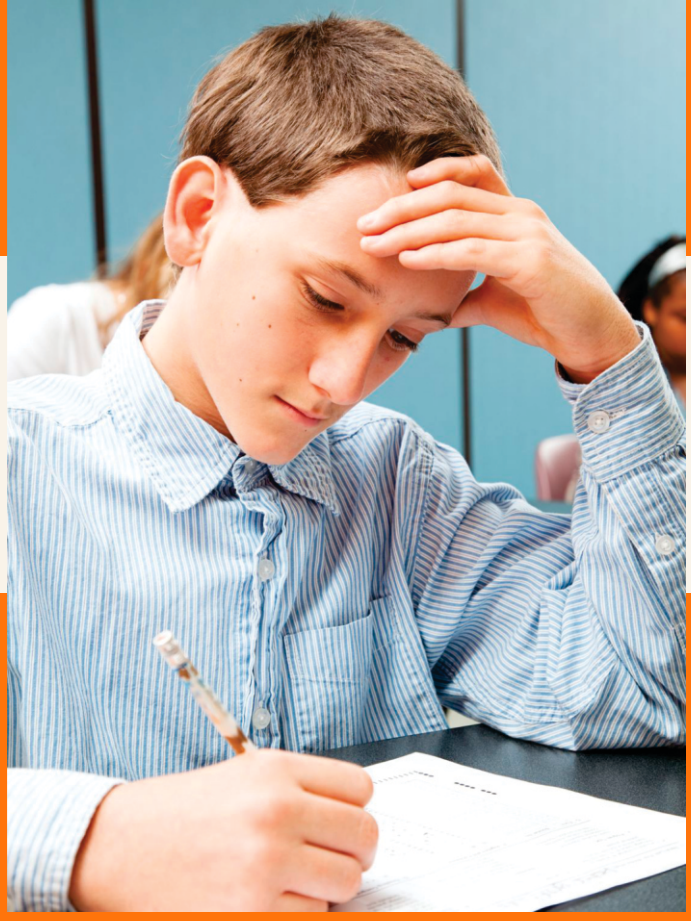

Time Saver

Teachers will love the COOLSIS Exam Reader as it is efficient, easy to use, and it automatically enters grades into the gradebook.

Go Green

The Documents module is the tool to organize all school documents for business purposes and educational aids.

Exam Reader

Teachers are always busy with all types of assignments and to alleviate this amount of work, teachers can use COOLSIS Exam Reader. Teachers no longer need to spend countless hours grading exams. COOLSIS Exam Reader application is easy to use with adjustable score weights for each exam.

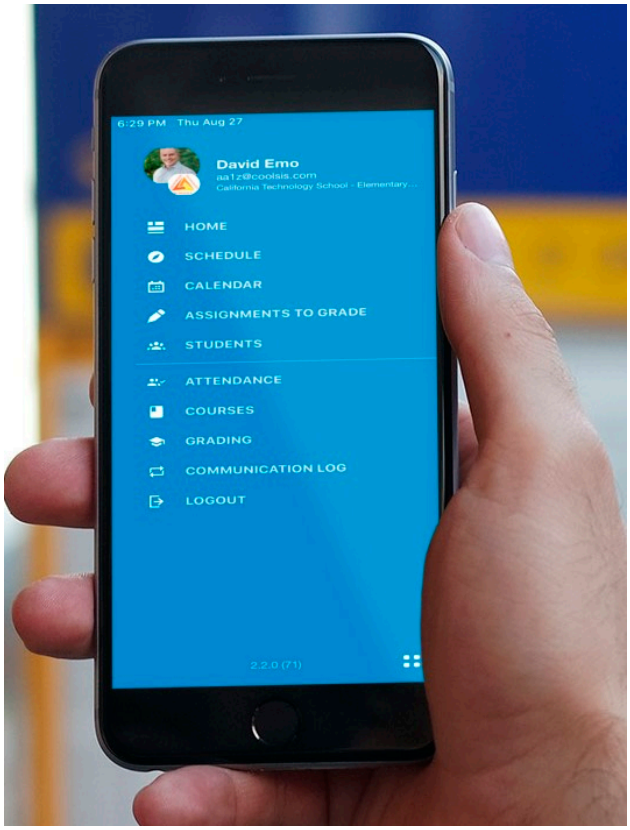

Document Storage

Being able to share school documents with parents and students is the key to improve communication and academic performance of each school. COOLSIS does that effectively in a simple manner by allowing administrators and teachers to upload documents and share them through the Documents module.

Flexible Fee Tracking

Keep track of all student fees with the Fee Tracking Module. The Fee Tracking module is flexible; allowing you to organize the payment process to satisfy your school's needs. COOLSIS allows you to restructure the payment plans of individual students. Due dates of scheduled payments can also be changed individually as necessary.

Mobile Access

Check out the Mobile Access to see why COOLSIS Mobile Applications are the perfect tool for parents, students and staff when it comes to keep up with all their academic needs. Moreover, COOLSIS Mobile App is free for parents, students and staff. COOLSIS Mobile applications can be downloaded in App Store and Google Play.
